CHALMERS

Postdoctoral Position in Biophysics

Salary: 220,000 – 260,000 SEK (tax free!) p.a. depending on qualifications.

This SSF-funded 2-year research position at Chalmers University of Technology, Göteborg, Sweden, concerns dynamical studies of biological materials by mainly neutron scattering and broadband dielectric spectroscopy. The focus is intended to be on the relation between solvent dynamics and biological properties. However, the successful candidate will also have a large freedom to test his/her own research ideas. We are particularly interested in candidates with a background in biophysics or biochemistry.

Further information is available from Dr. Jan Swenson (f5xjs@fy.chalmers.se)

Applications should contain CV, list of publications, a short summary of previous research work, and names and addresses of two reference persons. Candidates should send their applications (by post or e-mail) no later than 31 December 2003 to:
